About

Full-Stack Developer specializing in .NET and React, building scalable, secure, and maintainable web applications. Experienced with ASP.NET Core, C#, React, TypeScript, Entity Framework Core, SQL Server, and RESTful APIs. Strong foundation in Clean Architecture, SOLID principles, OOP, JWT authentication, and responsive UI development, with a focus on clean code and practical software engineering.

Projects

WorkPilot — Full Stack Task Management

- Built a full-stack SaaS task management platform using ASP.NET Core, React, TypeScript, and SQL Server, following Clean Architecture and CQRS.
- Implemented JWT/OAuth authentication, RBAC, RESTful APIs, SignalR real-time notifications, Redis caching, and secure workspace/task management.
- Developed a responsive React UI with TanStack React Query, Redux Toolkit, and Tailwind CSS, supporting dashboards, analytics, dark mode, RTL, and more.

Amazon E-Commerce Clone — Full Stack

- Built a full-stack multi-vendor e-commerce platform using ASP.NET Core, React, TypeScript, SQL Server, and Entity Framework Core, with RESTful APIs and layered architecture.
- Implemented JWT authentication, OAuth, RBAC, product/category management, shopping cart, checkout, Stripe payments, orders, reviews, shipping, and role-based workflows for Admin, Seller, Customer, and Delivery Agent.
- Developed a responsive React frontend with Redux Toolkit, TanStack React Query, Tailwind CSS, and Axios, including search, product browsing, order tracking, Arabic/English RTL, dark mode, and more.

Skills

- ASP.NET Core
- C#
- React
- TypeScript
- JavaScript (ES6+)
- SQL Server
- Entity Framework Core
- RESTful APIs

Education

Bachelor's Degree in Social Work | Helwan University | Cairo, Egypt | 2022 – 2026
